

2024 New MT774CPS - 73.7HP

[Read More](#)

SKU: MT774CPS

Categories: [LS Tractors](#)

Product Description

The new MT774 has been designed and positioned to offer a tractor capable of performing heavy-duty, high intensity tasks that would normally require a larger tractor in a smaller but premium package. With its 74 HP engine which does not require diesel exhaust fluid (DEF), the MT774 is the ultimate tractor option for tasks such as hay baling and other utility jobs. Despite all that power, the MT774 offers up to an 8.5% increase in fuel efficiency, better PTO efficiency, and uses the same loader (LL8100) as the MT7101 with a lift capacity of 5,139lbs (to Full Height at Pivot Pins).

Further, the tractor offers impressive interior cabin space, high-end specifications such as LED lamps in an attractive package all of which help meet the demands of premium tractor consumers
