Product Description

Umount 14HP Front Mounted Leaf Blower - 10867

Bigger is better! The newest product in our line. 14hp with electric start standard. For those who are serious about cleanups. When mounted to the front of nearly any commercial turf vehicle or zero-turn mower, this revolutionary leaf blower combines the versatility of a backpack blower with the performance of much larger and more expensive ride-on units. At 4-5 times the productivity of a backpack unit, and over twice that of a walk-behind unit, users are reporting significant labor savings. With patented designs including a tool-less mounting system, remote operated nozzle, and a breakaway nozzle, the Umount Blower is the last word in debris cleanup.

- Proprietary tool-less mounting system
 - Multi-Directional Nozzle Control
 - Magnetic Break Away Nozzle System
 - Remote Control Features
 - 210° Directional nozzle control
 - Throttle control
 - Engine stop switch
-
